TOI-OHOMAI

Institute of Technology

COMP.5209
Interface Analysis and Design

Due Dates

The due dates for the assessments will not be the same for you.
What I will be after is progression vs the amount of weeks. So by week 8 I expect for you to have about 60% of your project done.

Feedback

On Tuesday I will spend time with each team to monitor the progress and ask questions. Like I said in the first class, if your WHOLE TEAM cannot answer any questions from the DONE column at any time, it does back in the TODO column. Some feedback will be as a group, some feedback will be on an individual basis.

MARKS

As a group you will get a mark that counts for 90% for the course – the final 10% will be in form of feedback from myself and your peers which will come into play later on.

Free loaders

Free loading will not be accepted and there will be boundaries in place that will allow me to monitor the progress. If you are pinged for free loading, you will get marks deducted based on evidence and observation.
